Wesley Haruo Kurosawa

Data Analyst | Business Intelligence & Financial Analytics | Power BI, SQL amp; Python | Forecasting, Financial Reporting, Automation; Data Quality
Greater Toronto Area, Canada

Summary

I help companies transform complex data into automated executive dashboards, analytics solutions, and reliable business decisions. My work combines data analytics, process automation, KPI design, forecasting, financial reporting, and data quality to improve visibility, efficiency, and business performance.When finance and operations bring two different numbers to the same meeting, I'm the one who finds out which is right and fixes the pipeline so it doesn't happen again.I'm a Data Analyst with a developer background and nearly nine years of experience building databases, SQL solutions, ETL processes, and analytics platforms. I started my career as a Systems Analyst at Dasa and later moved into finance, working in claims analytics at Postal Saúde, FP&A at CNP Assurances, and financial reporting for a 20-store automotive dealer group in Ontario.This combination allows me to understand both the technical source of data and its financial impact on business decisions.I own the entire analytics lifecycle, from stakeholder requirements and data modeling to SQL and Python pipelines, automation, validation, reconciliation, and Power BI reporting. I specialize in solving operational, financial, and reporting challenges through analytics, automation, and business intelligence.RESULTS• Reduced monthly financial model preparation from 4 days to 3 hours through SQL, Python, and Power Query automation.• Developed Power BI dashboards used by 20 General Managers across 20 dealership locations.• Led finance data migrations involving up to 75,000 records with successful reconciliation and business sign-off.• Delivered real-time budget visibility for 12 project squads using Power BI and IBM Cognos.• Implemented SQL controls that identified duplicate claims and billing anomalies in healthcare datasets.• Built automated reporting solutions that improved data quality, reporting accuracy, and operational efficiency.SPECIALIZATIONS• Data Analytics & Business Intelligence• Dashboard Development (Power BI & Tableau)•

Experience

NextLens Data Analytics

Data Analyst

November 2025 - Present (1 year)

Ontario, Canada

Data migration, automation and financial reporting for small and mid-sized Ontario businesses moving off spreadsheets and manual bookkeeping.

• Reconciled each new system’s trial balance, opening balances and AR/AP to the legacy books at cut-over, catching $14,500 in duplicate supplier invoices and mis-mapped GL accounts before sign-off.

• Migrated 3 years of financial history (4,500 transactions) into QuickBooks Online and Xero, building chart of accounts mappings and removing legacy duplicates.

• Built Power BI dashboards (DAX, Power Query) on revenue, operating expenses, cash flow and gross margin, cutting the owner’s month-end reporting from 5 days to 3 hours.

• Built Python (pandas) and SQL ETL pipelines consolidating multichannel financial and sales data under one chart of accounts, replacing manual spreadsheet re-keying.

• Automated recurring accounting workflows with APIs and n8n; used LLMs to extract invoice line items, validated against the chart of accounts before posting (120 invoices/month).

• Led requirements sessions with business owners and documented data sources, transformation rules and data handling for each engagement.

Amazon

4 years

Operations Associate (Problem Solve)

2023 - Present (3 years)

Ontario, Canada

Completed the Amazon Career Choice Data Analytics program (SQL, Python, R, Tableau).

• Problem Solve function: investigated units and packages that failed to scan or route correctly, traced the error through the internal systems, corrected the record and cleared the exception.

Inventory Control & Quality Assurance (ICQA) Associate

2022 - December 2022 (less than a year)

Ontario, Canada

• Investigated high-volume inventory discrepancies and routing failures by tracing errors directly through internal warehouse management databases, correcting records at the root level.

• Executed high-precision cycle counts and bin audits on automated fulfillment floors, validating physical stock against system logs to maintain inventory ledger accuracy and meet strict operational defect-rate targets.

The Humberview Group

Financial Data Analyst

June 2020 - April 2022 (1 year 11 months)

Ontario, Canada

Financial and operational reporting for a 20-store automotive dealer group, serving general managers and head office finance.

• Built and maintained Power BI dashboards (DAX, Power Query) used by 20 general managers across 20 stores in weekly business reviews and by head office finance.

• Built SQL and Python routines over DMS output and rebuilt Excel models as Power Query workflows with validation checks, cutting monthly compilation from 4 days to 3 hours.

• Reconciled Dealer Management System (DMS) data to the general ledger across stores and OEM account structures.

• Ran variance analysis against budget, forecast and prior period, with written commentary for leadership.

• Supported month-end close with reconciliation schedules and exception reports.

RGIS

Auditor

January 2019 - June 2020 (1 year 6 months)

Ontario, Canada

• Reconciled physical counts to system records across thousands of SKUs, documenting each variance and its driver so management acted on verified counts.
• Ran validation and compliance checks that flagged inventory data anomalies before they reached downstream reporting.

CNP Assurances
Financial Data Analyst
November 2016 - October 2018 (2 years)
Brazil

Major French insurance group; FP&A and finance data for the Brazilian operation during the launch of a new digital subsidiary.
• Delivered monthly budget-vs-actual analysis of opex, project costs and Capex/Opex allocations within the close cycle, with variance reports for finance leadership.
• Built SQL and Python (pandas) validation routines over legacy cost tables, removing manual checks from month-end close.
• Validated and reconciled financial data between SAP S/4HANA (FI/CO) and IBM Cognos TM1, supporting data readiness for IFRS 16 lease accounting.
• Separated and reconciled costs between the parent insurer and the new digital subsidiary so each entity received correctly allocated data.
• Built Power BI and Cognos dashboards giving 12 project squads in-period visibility into budget consumption.

Postal Saúde
Data Analyst
December 2014 - October 2016 (1 year 11 months)
Brazil

Health plan for Brazil’s national postal service employees; joined at operational launch.
• Built SQL anomaly checks over claims and eligibility databases to flag duplicate claims, billing anomalies and provider overcharging, supporting fraud controls and regulatory reporting.
• Consolidated medical and financial data into a unified database after benefits administration moved from the postal service’s HR department into a new entity, keeping reporting continuous through the migration.
• Designed KPI dashboards tracking loss ratio, medical cost and provider network utilization.

SQL · Data Consolidation · KPI Dashboards · Healthcare Analytics · Anomaly Detection · Regulatory Reporting

Dasa

System Analyst (Data & Database Analyst — Clinical/Financial Systems)

February 2006 - November 2014 (8 years 10 months)

Brazil

Brazil's largest medical diagnostics company.

• Built ETL routines for system migrations under data governance and access-control rules, supporting go-lives across ~80 lab units.

• Consolidated data from three legacy platforms into one system after acquisitions.

• Wrote complex SQL queries and stored procedures to extract and validate high volumes of clinical and financial transactions.

• Diagnosed and corrected data errors at the database level, restoring accurate records for downstream reporting.

• Developed Informix databases, Informix 4GL applications and Linux/Unix shell scripts; deployed releases with their database changes.

• Implemented TISS electronic billing standards and card-reader patient check-in integration.

Education

Algonquin College of Applied Arts and Technology

Business Accounting

Faculdade Unyleya

Master of Business Administration, Project Management

University of Toronto School of Continuing Studies

Course, Business Analyst - Analyze, Model, Design and Deliver, Assess, Manage and Measure

União Educacional de Brasília - Uneb

Bachelor's Degree, Network Technology
